Also citizenship society in development exists problems and their solutions discussion will be done . Article Uzbekistan democratic reforms and far fixed-term in development citizenship society important instead to show directed .
Keywords: Citizenship society , national development , Uzbekistan , reforms , non-state non-profit organizations , neighborhood , democracy, social activism , law priority , "Uzbekistan-2030".	

Citizenship society formation and development Uzbekistan independence in the years the most important socio-political from the processes one as of the country national development in the strategy important place holds To independence achieved first in years citizenship society development mainly state control and local to traditions leaning if so , last years , especially since 2016 starting to do being carried out wide extensive reforms this to the process new approach and opportunities take came Citizenship society not only democratic state construction important element , but citizens social activity , state and society between the conversation provision and law priority in strengthening main factor . Uzbekistan new development in the phase citizenship society development of the country economic , political and cultural development with organ related and globalization under the circumstances national identity saved in case modern democratic institutions to shape service does This article In Uzbekistan citizenship society formation process , its to the development impact doer factors and this of the process country to the development the effect analysis to do is dedicated . In the article citizenship society historical and modern context , non-state role of organizations , neighborhood of the institute importance and this in the field exists of problems solutions seeing It is released .

Citizenship society concept world in practice various interpretation will be done . In general citizenship society when citizens own discretion with united , state and market from institutions independent in a way activity driver non-governmental organizations , public associations and active groups activity understood . Uzbekistan in the context of and citizenship society formation historical , cultural and political factors with circle depend Independence initial in the years citizenship society development mainly state control under was if so , last years reforms this in the field new opportunities created In particular , non-state non-profit activities of organizations (NGOs). support of citizens community in his work participation encouragement and openness to provide directed legislation changes citizenship society activation service did .

In Uzbekistan citizenship society in the formation national development strategy important place will hold . For 2017-2021 intended Activity strategy and next "Uzbekistan-2030" strategy for the years citizens political and social activity increase , law priority provision and state of services transparency to strengthen directed . These strategies within the framework to do increased reforms citizenship society of institutions to the development ground created For example , the "Electronic Government " system current of citizens state bodies with open conversation to do of

the possibility expansion and community councils organization being citizens in society instead strengthened . This changes citizenship society main from the tasks one is the state and society between the conversation in providing important step It happened .

Citizenship society in development non-governmental non-profit The role of organizations is special to the point have in Uzbekistan Number of NGOs and activity last in years noticeable to the extent increased . By 2020 to register more than 9000 NGOs in the country taken they are education , health conservation , ecological problems and gender equality like in the fields activity are conducting . This organizations citizens various social groups interests expression verb , their problems solution in doing state with cooperation to do task having done is coming For example , young people and women's social activity to increase directed projects , local of the churches to the development service doer initiatives citizenship society to be strengthened service is doing .

Citizenship society in development cultural and historical factors both important to the point have in Uzbekistan neighborhood institute citizenship society local shape as traditional and modern elements harmonizes . Neighborhood citizens mutual cooperation , social responsibility and community in his work participation verb important platform as service does . Last in years neighborhood to the system modern management methods current done , their citizenship role in society It will increase . and local of the churches activity increase and state with the conversation in strengthening important factor It happened .

With this together , citizenship society in development one row problems and obstacles there is For example , citizens political and social activity still complete high to the degree not released , some in the regions NGOs activity financing in the matter of difficulties preserved remains From this besides , citizenship society development for legislation base further improvement of citizens legal their knowledge increase and their state decisions reception to do in the process participation reinforcement necessary . This of problems solution of the country far fixed-term to the development service does .

Conclusion as to say maybe Uzbekistan national development new in the phase citizenship society formation and development of the country democratic reforms , socio-economic changes and cultural traditions with circle related complicated is a process . By the state to do being carried out openness , law priority provision and citizens social activity support policy citizenship society to be strengthened important

contribution added . Neighborhood institute and non-governmental non-profit organizations like local and modern mechanisms citizens in society active role in progress function of an important platform is passing . With that together , citizenship society complete development for exists problems - of citizens political-social of activity low , financial and legislator obstacles - on consistent work demand will be done . In the future this in the field reforms further deepening , in particular , legislation base improvement of citizens legal literacy increase and their state under the management participation expansion important to the point owner . This own next Uzbekistan national development stability provide , global democratic to standards suitable modern society construction and national identity saved in case international community with to integration service does Citizenship society development not only country inside social relationships strengthens , perhaps, Uzbekistan world on a scale prestige to increase both service does .
